- **Museum of the illusions**

The Museum of illusions with more than 600 square meters, exhibits optical illusions and visual games where small and large will be the protagonists of adventure and fantastic scenes with which to interact and above all where you can photograph yourself. DO NOT FORGET the photo camera, because the main idea with which this museum has been conceived is to immortalize yourself every time you immerse yourself in one of its landscapes.

More than twenty artists have worked for more than three months to create the different scenes of the Museum of Illusions. Each area of the Museum has been painted and designed so that the visitor, playing with perspective and optical illusions, can immerse themselves in the scene and thus be able to take the best photograph. Of course, you have to shoot the snapshot from the right place so that the perspective creates the optical illusion sought, for that reason, we will see on the ground some marks that will indicate the exact points from where to take the photos to get the best perspective.

Thus, we can be at the center of a zombie invasion, fighting with Darth Vader, in the ocean fleeing a great white shark, sitting at a tea ceremony in Japan or next to the dragon of Park Güell. Nor can there be a lack of references to the topics aimed at tourists, flamenco, ham, sangria, Salvador Dalí, etc ...
